Dear Sirs

CASS Scaffolding – National Museum Wales, Cardiff

We have been requested to provide a reference for the above scaffolding contractor and can confirm that CASS Scaffolding have been our preferred scaffolding contractor on a variety of projects over many years that have been both challenging and technically difficult. Including on the prestigious NGMW Project.

We have found them to be reliable and efficient who have consistently delivered.

The latest scheme at the National Museum of Wales was both innovative and required significant skill at every level. An over roofing scheme which incorporated haki beams, sliding roofs, safe and planned access, waste and delivery points and was completed on schedule and managed over a 12 month period, including inspections, adaptations and scoff tag etc.

CASS have both resource and management skills to complete any scheme.

I have known Tom Gent for many years and have found CASS to be approachable with a 'can do' attitude. We will no doubt be utilising their skills on forthcoming projects.

If any further information is required please do not hesitate to contact the undersigned.

Yours sincerely

Phil Wilmington
Project Manager
